Welcome to Marotta MedSpa

When it comes to beautiful skin, several factors contribute to the changes in texture, tone and appearance over time. Genetics and your body's natural aging process are things that can't be prevented - you may be predisposed to dry or thin skin, and everyone experiences a decrease in volume and collagen production with age. On the other hand, diet, lifestyle, environment, sun exposure and most importantly a good skin care regimen are all things you can control - and it's never too late to start taking better care of your skin from head to toe.

At Marotta MedSpa, we offer a wide variety of treatments to address nearly any skin issue you may be experiencing. We use the VISIA Complexion Analysis system, which allows us to use 3D imaging to conduct a detailed analysis of your skin, even below the surface. Under the direction of Dual-Board Certified Facial Plastic Surgeon, **Dr. James C. Marotta**, our team of highly trained professionals will then create a treatment plan customized to address your specific needs. They will consult with you, assisting you in the selection of the treatment or combination of treatments that will fit your lifestyle, while providing you with the exceptional results you expect from the superior care at Marotta MedSpa.

Healthy Skin Club™

Just as a strong body needs good food, regular exercise and quality sleep in order to stay healthy, your skin needs the proper balance of nutrients from a wide variety of treatments to stay radiant and beautiful. Many factors affect the health of your skin - age, sun exposure, climate, diet, lifestyle and genetics. Because the skin on your face and neck is thinner than the rest of your body, it's even more susceptible to **damage**. Uneven skin tone and texture, dryness, age spots and acne all contribute to the appearance of unhealthy or aged skin.

No single aesthetic treatment or product can effectively treat or reverse these conditions - beautiful, more youthful skin takes time and sometimes a variety of different treatments to achieve. That's why we created the Healthy Skin Club (HSC) at Marotta MedSpa. This monthly membership program includes discounts on treatments and products that make it easier than ever to employ the power of multiple skin treatments without breaking the bank.

When you join the Healthy Skin Club, your monthly subscription entitles you to exciting members-only benefits, including:

- Discounted rates on skincare treatments
- Discounts on medical-grade skincare products sold in our boutique
- Exclusive offers and discounts only available to HSC members
- A bonus \$100 gift certificate to Marotta MedSpa which can be used towards any treatment or product will be awarded on the 1-year anniversary of membership.

Our team of licensed providers will assess your skin's overall health and customize a treatment plan to reveal the beautiful, healthy skin you were meant to have. You can then enjoy the perks of membership while ensuring that your skin is living up to it's gorgeous, glowing potential. Join the Healthy Skin Club at Marotta MedSpa today and reap the rewards that membership offers!

Medical-Grade Skincare

When looking for the right skincare regimen that will effectively address your skin concerns, the sheer volume of available products can make your search a daunting one. While you may see some positive results from over-the-counter offerings, the majority of those products can't truly provide the results they claim. However, professional aestheticians know that medical-grade skincare lines are the best way to get the results you want from your skin care regimen in between treatments. Not only have these products been researched and their results proven through clinical research, but they are made with high quality ingredients that take longer to degrade, and they involve mechanisms for absorption that allow for product penetration deeper into your skin. At Marotta MedSpa, we offer several medical-grade skin care lines to enhance and prolong your treatment results. Consult with your aesthetician to select the skincare line that will offer the most benefits for you, and visit our MedSpa Boutique in house or online at

Facials and Microdermabrasion

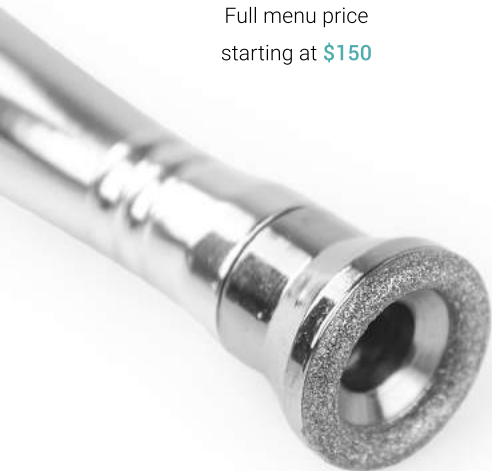

At Marotta MedSpa, our facial rejuvenation treatments can help improve your skin's overall feel and appearance and leave you with beautiful, healthy skin. We offer a variety of options, ranging from treatments to enhance healthy skin to addressing moderate to severe signs of aging.

Therapeutic Facials are specifically customized to your skin type to help treat, soothe, correct, balance and maintain any skin condition. Anti-aging Facials are restorative treatments designed to detoxify skin and stimulate cellular renewal, removing impurities and hydrating skin for a rejuvenated, more youthful look. Each 50-minute facial uses a custom combination of medical-grade skin care products to provide beautiful results with no need for downtime.

Microdermabrasion uses a diamond-encrusted wand to gently exfoliate your skin and vacuum away dead cells, activating healthy cell turnover and leaving you with a beautifully rejuvenated complexion. Microdermabrasion can be performed nearly anywhere on your body to smooth fine lines and wrinkles, reduce hyperpigmentation, lighten age spots, reduce acne and superficial scars, control oily skin and minimize pore size.

Facials and Microdermabrasion

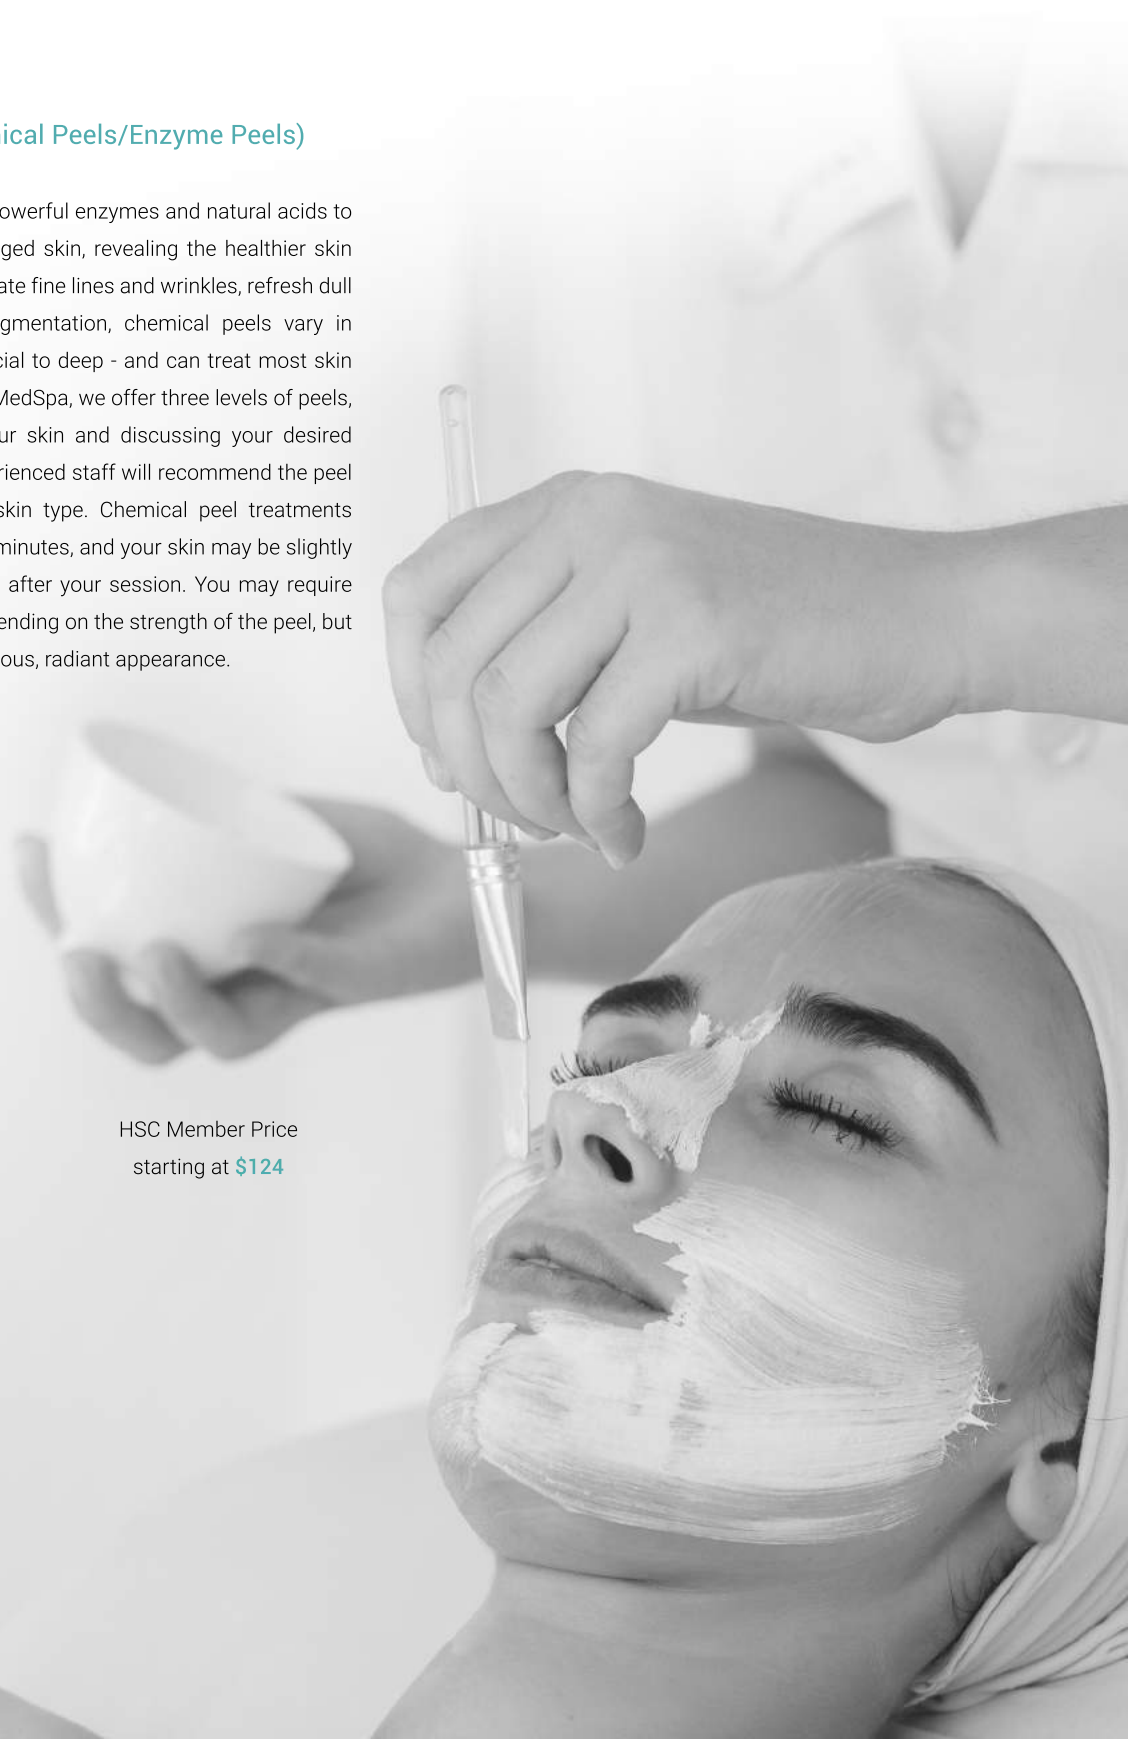

Peels (Chemical Peels/Enzyme Peels)

Chemical peels utilize powerful enzymes and natural acids to remove layers of damaged skin, revealing the healthier skin beneath. Used to eliminate fine lines and wrinkles, refresh dull skin and treat hyperpigmentation, chemical peels vary in strength - from superficial to deep - and can treat most skin conditions. At Marotta MedSpa, we offer three levels of peels, and after analyzing your skin and discussing your desired results, one of our experienced staff will recommend the peel that is right for your skin type. Chemical peel treatments typically take about 50 minutes, and your skin may be slightly pink for up to 24 hours after your session. You may require minimal downtime, depending on the strength of the peel, but the end result is a luminous, radiant appearance.

Dermalinfusion

Dermalinfusion

Dermalinfusion is a non-invasive treatment uniquely designed to treat the appearance of fine lines, wrinkles, hyperpigmentation, scarring, age spots and acne. Dermalinfusion uses a diamond-tipped wand to gently exfoliate the outer layer of your skin, and opens your pores to infuse specialty serums into your skin's deeper layers, where they can work from the inside out. There are several Dermalinfusion serums to choose from, addressing everything from tone and texture to restoring moisture and balance to your skin, as well as treating acne. Dermalinfusion treatments are 50 minutes long, require no downtime, and can be performed nearly anywhere on your body (including your face, back, neck, legs and décolletage).

Treatment Enhancer

At Marotta MedSpa, we offer enhancing serums that can be added to almost any treatment to provide additional benefits tailored to your needs. Different enhancers can be included in the serums, masks and creams used in most treatments, and contain ingredients such as retinol, vitamin c, hyaluronic acid, kojic acid and plant-derived stem cells. These essential boosters are used to treat a variety of skin conditions to further optimize your results, and depending on what you choose, can help to hydrate, plump, treat acne, stimulate collagen, lighten and brighten, and decrease cell damage.

Injectables

Perfect for anyone of nearly any age, injectable treatments have become the most popular cosmetic treatments performed to help reduce wrinkles, restore volume and improve the overall appearance of your skin.

As we age, our face naturally loses fat and volume associated with a youthful appearance. With this loss, the bones and muscles are closer to the skin's surface, making wrinkles more apparent and hollowing more pronounced. At Marotta MedSpa, we offer a wide variety of FDA-approved dermal fillers, all of which have different applications. They include hyaluronic acid fillers (Juvederm, Restylane and Belotero) and collagen-boosting fillers (Radiesse and Sculptra) designed to reduce wrinkles, eliminate hollows or bags from under the eyes, add volume to the cheeks and soften facial contours.

If you have wrinkles formed by repetitive facial movements like frowning, squinting and smiling, Botox may be the solution. The treatment works by blocking nerve impulses to the muscles, causing them to relax and soften your expression, smoothing the skin that lies above the muscles being treated. Besides Botox, we offer Dysport and Xeomin to help treat frown lines, crow's feet, forehead creases, lines at the corners of the mouth and fine lines around the lips. They can also be injected into the palms of the hands, underarms

Laser Hair Reduction

Not only can unwanted hair be annoying, it can also be embarrassing for both men and women of all ages. While there are many temporary fixes available, laser hair removal treatments successfully eliminate hair by destroying the individual hair follicles so that future growth is prevented. At Marotta MedSpa, we use the Icon Laser Max R for permanent hair reduction.

The Icon laser works by directing a beam of concentrated light at the hair follicles to destroy them, while a cooling device protects the skin. Treatments can be performed on any area of the body with unwanted hair, and unlike other hair removal systems, can safely be used on all skin types from light to dark. Treatments last 30-60 minutes and are best purchased as a package (a minimum of six treatments is recommended) to effectively eliminate all phases of follicular growth, but can be purchased individually as well. With laser hair removal, you never have to worry about being "hair unprepared" again.

Laser Hair Reduction

Visia Skin Analysis

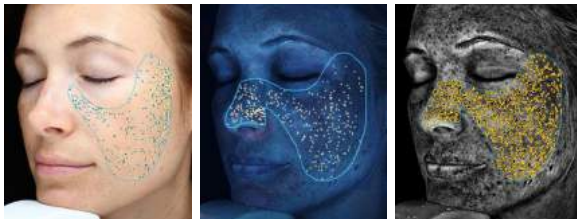

At Marotta MedSpa, we are committed to providing you with the treatment or combination of treatments that will best address your individual skin concerns. To discover the extent of the damage to your skin due to the effects of genetics, sun exposure, environment and lifestyle, we offer a complimentary in-depth skin analysis using the VISIA Complexion Analysis system. VISIA uses multi-spectral imaging and analysis to provide a multi-dimensional picture of six individual areas that affect the overall health and appearance of the skin on your face:

Wrinkles

Spots

Pores

Texture

Porphyrins
(bacteria in the pores)

UV spots
(sun damage)

Not only does the analysis give us a comprehensive picture of your skin, but it also compares your skin to others of the same age and skin type. VISIA also enables our team of experienced aestheticians to choose the treatments that will provide you with optimal results, and can also be used to track your progress over time, showing visible improvements as we work to restore health and vitality to your skin.
